IN THE CLAIMS

Please amend claim 1 as follows:

- E1
Sub
- 1.(Amended) A device for storing [and managing] an elongate flexible member having a length, a first end and a second end, the device comprising:
- a container having a base, a side wall, and a first access hole;
 - a spool disposed within the container, the spool comprising:
 - a bottom resting upon the base of the container, a top having a second access hole, and a column between the top and the bottom, the column [defines] having a surface for [wrapping] winding the length of flexible member around, wherein the second end of the flexible member passes through the second access hole and wherein the first end of flexible member passes through the first access hole of the container;
 - a foot plate secured to the base of the container, the foot plate including mounting holes which extend through the foot plate;
- B1
